ClearView Laser Telescopes
Tested and certified to the highest international standards

**Patented Dual Lens Design**
Laser is filtered twice:
- Front Absorptive Polymer Lens filters the laser before magnification
- Rear Custom Dielectric Lens filters the laser again after magnification

CLEAR un-tinted view through telescopes
Tested and certified by Din Certco for 2.5x, 3.5x, 4.5x and 6.0x magnifications

**Micro2.5x Scopes™**
Custom 2.5x magnification in a new lighter weight design

- 23% Smaller
- 36% Lighter
- Maximum peripheral vision

**Micro3.5EF Scopes™**
The lightest 3.5x expanded field loupes you can wear all day

- Revolutionary prismatic design
- 50% Smaller
- 40% Lighter
- Maximum peripheral vision

**NEW MicroSeries Scopes™**
the smallest, lightest magnification

**Actual Size**

- Micro2.5x Scopes™
- Micro3.5EF Scopes™

- Rectangular shape for maximum peripheral vision
- Proprietary precision optical coatings for greater light transmission
- Custom fit for personalized ergonomics
Custom Dental Telescopes
Each pair of dental telescopes is individually manufactured to your unique specifications

Designs for Vision custom builds your exact measurements and prescription into your own personal pair of dental telescopes. That's the Visible Difference®

Performance
Truth in magnification
Precision coated optics
Greater depth of field

Ergonomics
Optics focused to YOUR working distance
Eye glass Rx in both telescopes and carrier lens
Custom fit - for your eyes only

Standard Field Surgi-Spec® Telescopes
available in powers of 1.7x, 2.5x, 3.5x, and 4.5x

2.5x
3.5x

Expanded Field High-Vision® Telescopes
available in powers of 3.5x-EF, 4.5x-EF, and 6.0x-EF

3.5x-EF
4.5x-EF

Durability
Fixed position TTL
No movable parts
Designs for Vision quality since 1961

Protection
ANSI Z87.1-2015 rated
Excellent infection control
Safety Scopes for UV protection available on all telescopes
